DETAILED ACTION

*Claim Rejections – 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(a) The invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claim 1, 2 and 5 are rejected under U.S.C. 102 (a) as being anticipated by the prior art, which is admitted by the applicant in the specification.

Regarding to claim 1, see pages 1 and 2 of the specification, the admitted prior art

Discloses a mobile phone having a keypad module and an LCM module, comprising:

a main printed circuit board (see page 1, line 7); a first contact point and first lateral short leg (considered together as first connector) and a second contact point and a second lateral short leg (considered together as

Art Unit: 2682

second connector) being welded respectively onto a first predetermined location and a second predetermined location on the main printed board (see page 2, lines 2-4), a first reference power supply and a second reference power supply being provided respectively to said first connector and said second connector ( see page 2, lines 4-6), said main printed circuit board being divided into a first portion corresponding to said keypad module and a second portion corresponding to said LCM module (see page 1, lines 7-8);

a holder, said holder comprising a space accommodating said LCM module, said holder comprising a slit at a predetermined location of said holder (see page 1, lines 15-18); and

a secondary printed circuit board for carrying a plurality of LEDs to provide a back light source (see page 1, lines 18-20), said secondary printed circuit board being disposed within said slit (see page 1, lines 16-18), said secondary printed circuit board comprising a first contact point and a second contact point, wherein said first contact point correspondingly

contacts with said first connector and said second contact point correspondingly contacts with said second connector (see page 1, line 21 to page 2, line 9).

Regarding to claim 2, the admitted prior art discloses that said first connector and said second connector are respectively welded onto said main printed circuit board (see page 2, lines 1-8), which is inherently made by means of a technology.

Regarding to claim 5, the claim is interpreted and rejected for the same reason as set forth in claim 2.

***Allowable Subject Matter***

3. Claims 3,4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claim 3, the prior art of record fails to teach an electro-luminescent sheet to provide another back light source.

Regarding claim 6, the prior art of record fails to teach steps 4 and 5 as claimed.

***Conclusion***

4. References Jeong (2001/0006380), Hoelen et al (2001/0035853) and Bowen (6,052,606) are additionally cited because they are pertinent to the claimed invention. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sanh D Phu whose telephone number is (703)305-8635.
